

Technical Bulletin

Year 2000 Compliance

Year 2000⁺ *Compliant*

ZNYX Networks adapters are designed with date-independent hardware and software. These products comply with applicable functional tests for the year 2000 and beyond.

ZNYX Networks switches with a central processing unit (CPU) use the Linux operating system. Linux has been tested and approved for Y2K Compliance. ZNYX Networks switches without a CPU are date-independent and comply with applicable functional tests for the year 2000 and beyond.

The ZNYX Networks software supplied with each adapter is date-independent. When used in a complete Year 2000-compliant computer system (including operating system, network protocols, utilities and application programs), each ZNYX Networks adapter will operate with full functionality and performance.

ZNYX Networks cannot ensure full functionality and reliability in any system that is not Year 2000-compliant.
